

## Hemiarthroplasty Repair

You have had a hemiarthroplasty repair which involves removing the fractured head and neck of the femur and replacing the fractured bone with a prosthesis (an artificial, metal implant).

Do not put more weight on the operative side than your Doctor, Nurses or Therapists say you can.

You may use a pillow between your legs for comfort when you are lying in bed.

**How much weight you can put on your repaired leg:**

**Notes**
