Table 7: Monitoring Indicators

Table 7: MNCY SCN monitoring indicators without a comparable existing indicator, by population group.

Child and Youth	Newborn-Infant (including neonatal intensive care unit (NICU))	Maternal - Fetal
Number of emergency department visits by child with complex care needs by age (up to age 24 years)	Neonatal mortality in the labour and delivery area by gestational age	Maternal morbidity rate for the following: • hysterectomy post-cesarean section • greater than 4 units of blood loss at delivery • return to operating room within 24 hours post-delivery • admitted to ICU post delivery • readmission post-partum with venous thromboembolism (VTE)
	Rate of exclusive, total, predominant, and partial breastfeeding during the following post-partum periods: • 0 months to less than 2 months, • 2 months to less than 4 months, • 4 months to less than 6 months, etc.	Proportion of women accessing care in first trimester
	Rate of breastfeeding initiation at birth Percentage of newborns discharged from NICU with three or more medical needs Rate of neonatal hospital readmission within 90 days post-discharge following birth	Proportion of women who have less than four prenatal visits
