# Embedding Action on Social & Preventative Factors in Connect Care October, 2018

## **Purpose**

To work in partnership with CKCM to integrate social and preventive factors into the development of the AHS clinical information system (Connect Care)

#### **Current Status**

### **Identified five Clinical Knowledge Topics for development:**

- Lifestyle factors (tobacco, alcohol, nutrition, physical activity) second revision to draft topic in progress. Topic will be ready for circulation to SCN by mid-October
- First draft of the following topics in progress:
  - Poverty/financial resource strain
  - Adverse Childhood Experiences
  - Domestic Violence
  - Indigenous Status

## **Next Steps**

Complete drafts and circulate to SCN for review and feedback
