

2017-18 AHS Employee Influenza Immunization Rates

by Workplace Location

January 15, 2018

INTRODUCTION

Influenza vaccine has been shown to be an effective measure for reducing the risk of transmission of the influenza virus. Healthcare workers are at an increased risk of both being infected and infecting others. A better understanding of influenza coverage among staff at AHS will help increase the immunization rates for future years.

Influenza Immunization is not mandatory for AHS employees. If an AHS employee chooses to be immunized, it's easy to do so. They can:

- (1) Visit a Workplace Health and Safety (WHS) clinic and/or Site Champion immunizer;
- (2) Visit an AHS Influenza Immunization Clinic (public health);
- (3) Visit a Pharmacy or Physician's Office.

Alberta Health (AH) captures immunization records for all Albertans, including AHS employees who have not reported their immunization to AHS. AHS has worked with AH to overlay the data sets to establish a more accurate influenza immunization rate of AHS employees.

Confidentiality of individual immunization status was maintained as only aggregate data (not individual records) was returned from AH.

The following symbols will show each facility's influenza immunization rates and will be updated throughout the campaign.

- = 80% or higher
- ▲ = between 60 - 79.9%
- = lower than 60%

Listed below are each organization's total number of employees and their influenza immunization rate as of January 15, 2018.

	total # of employees	% immunized
▲ Alberta Health Services (AHS)	97,591	65%
Partners (non-AHS employees)		
▲ Calgary Laboratory Services	1,973	66%
▲ Capital Care	2,502	72%
▲ Care West	2,702	76%
● Covenant Health	10,460	54%

Influenza immunization rates by site are not available for Calgary Laboratory Services, Capital Care or Care West. Site specific rates are included in the following pages for Alberta Health Services and Covenant Health.

Notes on data collection:

- This data is reflective of information in the system as of January 15, 2018.
- Influenza vaccination is voluntary for health care workers. AHS employees can also consent or decline to report their immunization status to the organization.
- The rates reported are conservative. Individuals that have gone to a Public Health Clinic or to third party providers (such as their physicians, their local pharmacy or other providers) and have not submitted their information to AHS will not have their vaccination accounted for in this report.

WORKPLACE LOCATION	AHS Employee Influenza Immunization Rates – Jan. 15, 2018 Percentage (%)	AHS Employee Influenza Immunization Rates - Dec. 4, 2017 Percentage (%)	Difference in Rates Between December 4, 2017 & January 15, 2018 Percentage (%)

* The negative number is a reflection of the movement of staff to and from facilities as they join AHS or leave their position. This negative number does not reflect a negative immunization rate, rather it illustrates the changes in the worker population employed at each specific location. Our smaller facilities are most sensitive to these changes over time.
