# Directory of Research & Evaluation Report

## Health System Evaluation & Evidence

### Introduction

Health Systems Evaluation & Evidence is an internal model of research and evaluation operation within Alberta Health Services. Formerly established in April 2017, this operation is the result of an amalgamation of Workforce Research and Evaluation & Evaluation Services.

The term of most studies occurs over multiple fiscal years. Some are follow-up studies on the same topic. To best illustrate the accumulated body of research and evaluation work, this directory includes products completed over time. Some records within this directory are captured retrospectively, so may not always provide a complete account of all contributions.

Titles that are highlighted in **blue text** highlights work produced in the most recent fiscal year: April 1 2017- March 31 2018.

This directory also captures an accumulated body of work over time including:

- Health Systems Evaluation & Evidence Evaluation Reports: Jan 1 2011 – March 31 2018
- Health Systems Evaluation & Evidence Research Reports: Jan 1 2011 – March 31 2018
- Workforce Research and Evaluation Publications: 2006-March 31, 2018

In addition to completed research and evaluation reports, work dedicated to collecting primary data for various contracts is also captured.
