

# Management of Patients Requiring Airborne Isolation in the Absence of Airborne Isolation Rooms

- ❑ Apply a procedure mask to the patient.
- ❑ Apply airborne or airborne & contact precautions: staff require fit tested N95 respirator, gown and gloves
- ❑ Follow [Management of Patients Requiring Airborne Precautions for Suspected or Confirmed Measles](#) if applicable

\*[Creation of Temporary Airborne Isolation Rooms](#) document may be used to select and adapt rooms for temporary airborne isolation
