

# Clinician Information Sharing Compact

Principle	AHS Responsibilities	Clinician Responsibilities
<b>Patient Guided</b>	Prioritize information sharing processes to support patient well-being first, ease of use next, followed by organizational needs.	Embrace and support information sharing for patient well-being and clinical improvement
<b>Provider Access</b>	Facilitate timely, reliable and secure access for all Clinical Information System (CIS) users wherever and whenever CIS information sharing is required; including access for legal or professional needs	Care for and secure CIS personal access credentials, while keeping practitioner contact information current and accurate.
<b>Patient Access</b>	Facilitate timely, secure and relevant access to patients' health records, using a Connect Care Patient Portal.	Respond to patient queries about CIS records and direct as appropriate to AHS information services.
<b>Disclosure</b>	Receive and coordinate requests for the disclosure of health information to third parties, respecting clinicians' interests.	Respond promptly when made aware of information disclosure needs, respecting patients' expressed wishes.
<b>Protection of Information</b>	Develop, implement and support technical, physical and administrative safeguards to protect health information while providing appropriate user training.	Be aware of and adhere to CIS information protections and notify AHS when compromise or breach is suspected.
<b>Use</b>	Be transparent and accountable to clinicians, staff, government and the public with respect to the use of health, clinician or organizational information stored in or extracted from the CIS.	Be accountable for the allowed use of CIS health, clinician and organizational information while respecting the contributions of others.
<b>Clinical Improvement</b>	Support clinical and health system improvement initiatives, including clinical research, quality improvement and educational advancement.	Identify opportunities for clinical and health system improvement and collaborate to produce and use the information required.
<b>Accuracy</b>	Take steps to ensure that data flowing in to and out of the CIS are accurate, reliable and corrected; and provide users with convenient means to report errors.	Completely, accurately and promptly contribute healthcare service information to the CIS, using accepted standards; and report possible errors.
<b>Governance</b>	Establish balanced, multidisciplinary and meaningful CIS information sharing governance structures that are empowered to address information sharing issues.	Take advantage of opportunities to meaningfully participate in information sharing governance structures, including reporting information sharing issues for review.
