

## Allergies / Adverse Reactions

The gathering and documentation of allergy information is the responsibility of **all** licensed health professionals (Pharmacists, Nurses, Physicians, Allied Health and Dietitians etc.).

- **Coded** allergies are those contained within the allergen dictionary look up.
- **Uncoded** allergies are allergens not found in the lookup and need to be free text into the system.
  - **Uncoded** allergies do not use interaction checking, i.e. will not notify Pharmacy there is a conflict with medications ordered.

**Allergy** status should be **confirmed** as soon as possible **following each admission for all patients.**

### Type [of reaction]

<b>Allergy</b>	Hypersensitivity reaction of the immune system to foreign substances which are normally considered harmless: i.e. rash when taking Penicillin
<b>Adverse Reaction</b>	A reaction to a drug, food, vaccine or other substance which is noxious or unintended, and which occurs at doses normally used. It may or may not involve the immune system: i.e. nausea/vomiting following a Demerol injection

### Definitions:

<b>Severity</b>	<b>Discomfort</b>	<b>Activity limitations</b>	<b>Medical intervention/therapy</b>
<b>M-Mild</b>	Transient/mild< 48 hrs.	None	None required
<b>I-Intermediate</b>	Mild/mod.	Mild/mod – due to symptoms Min. assistance required	None or minimal
<b>S-Severe</b>	Significant	Significant incapacitation - assistance required	Necessary, may include hospitalization. May be life-threatening
<b>U-Unknown</b>	Unable to determine severity. Comment should be used as to why severity is Unknown.		

- **Verified – Y** – indicates a licensed healthcare professional has investigated and validates the allergy or adverse reaction.
  - Entering an allergy as verified indicates that the following information was considered and validated as completely as is possible.
    - Estimated date of last reaction
    - Duration of reaction
    - Number of prior reactions
    - For drug allergies, specific drug, dose, formulation and route of administration

- Description of clinical manifestations of reaction
- Therapies attempted to abate reaction and response include any hospitalizations that were required
- Any physician recommendations resulting from contact
- Any record of reactions to similar chemical entities
- **Verified – N** – indicates the allergy or adverse reaction has not been investigated.

## Entering Allergies from the EMR

In an individual patient record click on the little blue **“more info”** icon in the header of the EMR screen.

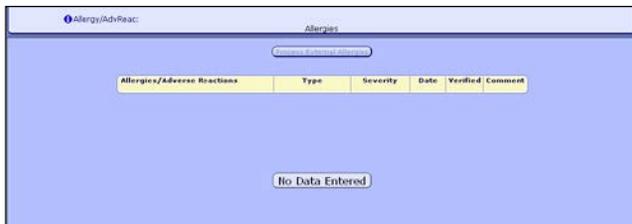

Enterprise Medical Record - Ruzicka, Kim

Udemr Fentova, Emer Rose      Multiple / PB00054216 / ABATVIG00411641-FS1  
 DOB: 16/6/90 24 F      Multiple

**Allergy/AdvReac:** Egg Derived, Peas, SYTRO CUPS, acetaminophen, atropine, blue towels, brown towels, codeine, morphine, ...  
 Summary

Allergies/Adverse Reactions	Type	Severity	Date	Verified	Comment
<b>Allergies for Interaction Checking (7)</b>					
Egg Derived (EGGS) OTS 5478	Allergy	Intermediate	17/2/15	Yes	
Peas	Allergy	Intermediate	17/2/15	Yes	
just don't like Acetaminophen	Allergy	Intermediate	17/2/15	Yes	
trusting background jobs Atropine	Allergy	Intermediate	17/2/15	Yes	
heart slows Morphine	Allergy	Intermediate	17/2/15	Yes	
RASH ALL OVER BODY, sneezing Penicillin G	Allergy	Intermediate	17/2/15	Yes	
blisters Codeine	Allergy	Mild	17/2/15	Yes	
<b>Un-coded Allergies/Adverse Reactions (3)</b>					
Sytro Cups	Adverse Reaction	Intermediate	17/2/15		
FLU'Y NOISE Blue Towels worse than pink	Adverse Reaction	Intermediate	17/2/15		
Brown Towels too dark	Adverse Reaction	Intermediate	17/2/15		

The list of allergies will display.

Allergies

Allergies/Adverse Reactions    Type    Severity    Date    Verified    Comment

No Data Entered

If no allergies are documented the header will be blank and this screen will display.

NKA    Unable to Obtain    Select All    Patient Data    Audit Trail    Confirm    Verify    Undo    Delete    Edit    Enter New    Prev    Next    Cancel    Done    ?    [Icons]

- **NKA** – when no allergies or adverse reactions exist
- **Unable to Obtain** – when Allergy data not able to be obtained from patient or responsible person
- **Select All** – selects all allergies
- **Patient Data** – (available for use if in a single visit, cannot be used if Viewing ALL Visits) enter data such as Height and Weight
- **Audit Trail** – display data on when, who and what information was entered in the Allergy Routine

- **Confirm** – all allergy data has been reviewed and remains the same. If any data needs to be changed then use the Edit button
- **Verify** – a licensed health professional uses this to verify allergies that are at Verified “N”
- **Undo** – to remove an allergy (prior to saving) if entered in error
- **Delete** – delete an allergy after it has been saved. If deleting an allergy first **Edit** and indicate in the comment box the reason for Deletion. **Save, Save** and then **Delete**.
- **Edit** – change any data related to that allergen
- **Cancel** – exit the Allergy Management screens if an allergy has been entered in error and not yet saved
- **Done** – completed entering data

### Entering a new allergy:

- Click the **Enter New** button at the bottom of the screen
- As you start typing in the Allergy/Adverse Reaction field a drop down list appears and starts narrowing the search list as each letter of the allergen are entered

Once the allergen is identified, click on it.

Information regarding this allergy can now be entered.

Allergy/Adverse Reaction

Allergy / AdvReac	Other Name	Category
penicillamine		Drug
penicillin G		Drug
penicillin G procaine		Drug
Penicillin V		Drug
Penicillins		Drug
Penicillium Notatum	Fungi	Environment

Once all data has been entered select **Save** at the bottom of your screen.

Fields with a \* are required.

Allergen/AdvReac

\*Type  Allergy  AdvReac

Severity  Mild  Intermediate  Severe  Unknown

\*Verified  Yes  No

\*Reaction

Comment

The allergen you just entered will display in Green.

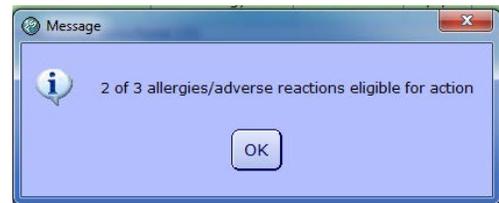

You can now enter more allergies if required or if there are no further allergies to enter select **Save** at the bottom of your screen and then select **Done**.

Allergies/Adverse Reactions	Type	Severity	Date	Verified	Comment
<b>Allergies for Interaction Checking (2)</b>					
Orange blisters Morphine	Allergy	Mild	18/2/15	Yes	
TIGHT CHEST	Allergy	Mild	20/1/15	Yes	
<b>New Allergies/Adverse Reactions (1)</b>					
Penicillins testing	Allergy	Mild	25/2/15	Yes	

### Confirming an Allergy

Indicates allergy data has been reviewed and all data remains the same. If any data needs to be changed then use the **Edit** button and edit the data as required.

- Allergies can be confirmed individually or all at once.
  - To confirm all allergies at one time:
    - Select the **“Select All”** button on the toolbar at the bottom of the screen
    - All allergens will highlight
    - Select the **“Confirm”** button on the toolbar
    - Pop up box will display indicating how many allergies will Confirm. Select OK.
    - Date will change to the current date for **all coded** allergies
    - Select **Save** from the toolbar
    - Select **Done**

### NKA and Unable to Obtain

Users have the ability to enter **NKA** (No Known Allergies/Adverse Reactions) or **Unable to Obtain** from a single button selection at the bottom of the allergy screen.

- If there are allergies listed for the patient **NKA** and **Unable to Obtain** buttons will not be accessible (low lit).

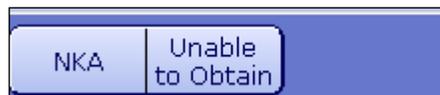

- If the patient has **NKA** listed for their allergy data the **Unable to Obtain** will be low lit.
- If the patient has **Unable to Obtain** listed for their allergy data the **NKA** will be accessible.
- If the patient has allergies listed but identifies they do not have allergies the existing allergies will need to be deleted before NKA can be added. Remember to enter a comment first as to why the allergies are being deleted. Save the comment. Proceed deleting the allergy.
- Once the allergies have been deleted the NKA will be available to select.

### NKA – If the patient has NO Allergies or Adverse Reactions NKA can be entered.

To enter **NKA**

- Select the **NKA** button.

Once selected this screen will display

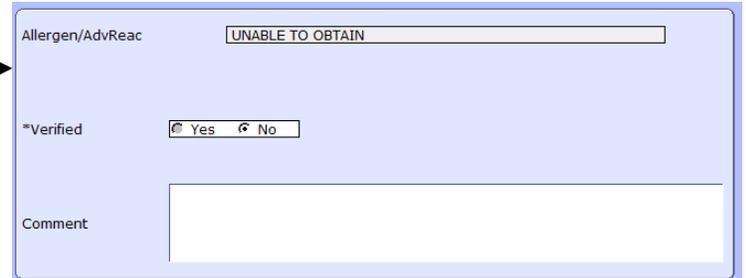

- Select **Save, Save and Done.**

Allergies/Adverse Reactions	Type ▾	Severity	Date	Verified	Comment
- New Allergies/Adverse Reactions (1)					
No Known Allergy / Adverse Reaction			25/2/15	No	

**Unable to Obtain** – this is used when allergy data is not obtainable from the patient or most responsible person. (i.e. a parent in the case of a minor)

To enter **Unable to Obtain**

- Select the **Unable to Obtain** button
- This screen will display
- Verified No will be auto selected. This cannot be changed.
- A comment can be entered to identify why the allergies are unobtainable.
- **Save, Save, Done**

The screenshot shows a form titled 'Allergen/AdvReac' with a text input field containing 'UNABLE TO OBTAIN'. Below this is a '\*Verified' section with radio buttons for 'Yes' and 'No', where 'No' is selected. At the bottom is a 'Comment' text area.

**\*\*\*For both NKA and Unable to Obtain: by adding an allergy (Enter New) the NKA and Unable to Obtain will auto delete.\*\*\***

**\*\*\*NKA and Unable to Obtain will always be Verified- No. This will enable it to be removed by both Verified and Unverified users\*\*\***

Types of Care Providers that may be set up to identify allergies as Verified.

- Diagnostic Imaging Technologist
- Diagnostic Imaging Registered Nurse
- LPN – Licensed Practical Nurse
- Nurse Practitioner
- OT/PT/Rec/Resp/SLP Therapist
- Pharmacist
- Physician
- Resident
- RD – Registered Dietician
- RN – Registered Nurse
- RPN – Registered Psychiatric Nurse

Types of Care Providers that would be set up to identify allergies as Unverified.

- Dietary Technologist
- Diet Clerk II
- Laboratory Technologist
- OR Scheduling Staff
- Pharmacy Technician
- Social Worker
- Unit Clerk
- Students
