

Creating or Searching for Training Patients

If you have Admitting access, you can create your own patients in Meditech 567TEST environment.

Please use **TRAIN** as the patient's middle name.

For example: **DOG,HOT TRAIN**.

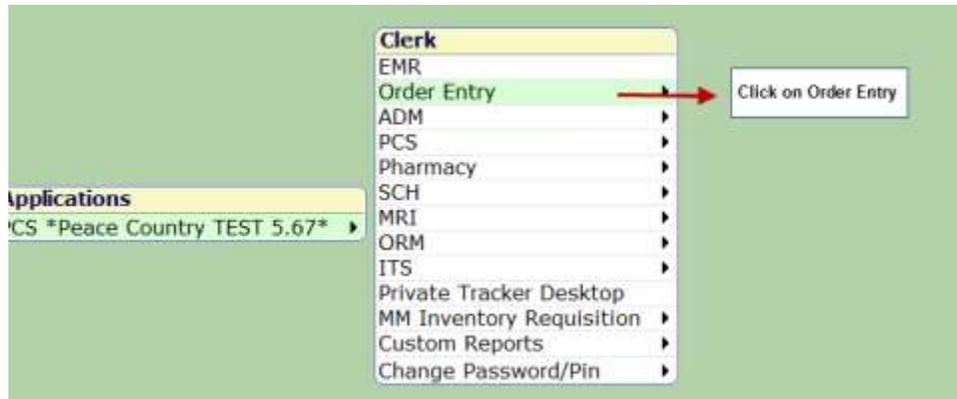

Do not use any personal or family identifiers, or assign a PHN to your patient.

The following screenshots show the **search** process in the Order Entry module.

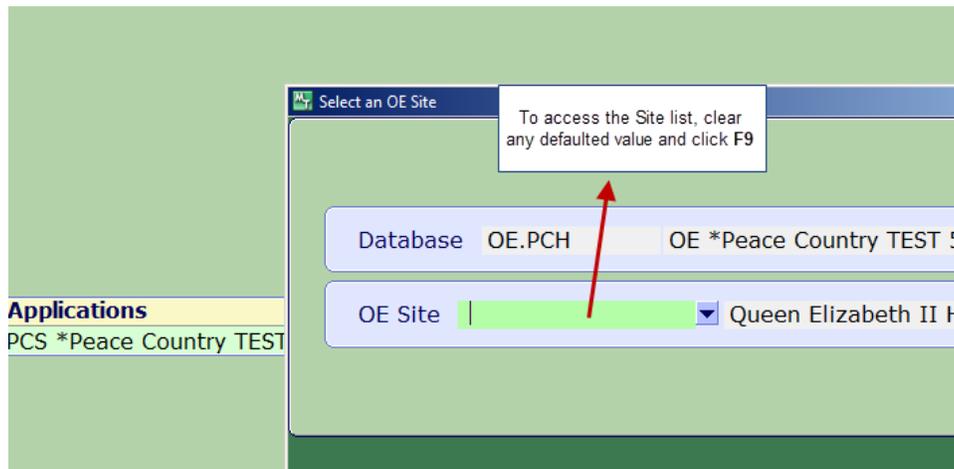

Please use patients with the middle name **TRAIN**

WARNING: As Printers are not set up in TEST – Please Do Not use the 'Print' functionality
