SAFETOUCH™ II

SAFETY FISTULA NEEDLE

Once locked, stays locked.

- The only system with *built-in* safety advantages: a permanent locking feature eliminates the worry of accidental needlesticks; textured wings provide secure grip; system is low profile and is designed to meet all OSHA safety requirements.

Quality you expect. Support you deserve.

- The NIPRO CONNECTSM PROGRAM is our commitment to provide every dialysis customer with products of unmatched value through a continuous quality improvement process. In addition, it assures that service, education and the required technical support are provided to each of our business partners.

SAFETOUCH™ II

SAFETY FISTULA NEEDLE

Below are highlights of proper use of the SafeTouch™ II Needle. For complete information, please refer to the Instructions For Use printed on the outer product carton.

Peel open the package from the position marked "PEEL HERE." Do not break open the package to remove product.

Safety is built in to the SafeTouch™ II needle design. After removal from package, check to ensure that wing protector is securely locked into the stopper.

At end of procedure, close clamp, apply pressure to site and hold down wing protector; release lock by pressing both sides of stopper, sliding stopper back until it becomes fixed with audible or tactile click.

Once wing protector is fully engaged, dispose of protected SafeTouch™ II needle in an approved sharps container.

ORDER SPECIFICATIONS

Product Code	Description	Wing Color
FS+142530BC	14G x 1"	Purple
