Mobile mammography service to visit St. Paul

ST. PAUL — The Alberta Health Services Screen Test program will be in St. Paul to provide screening mammograms to eligible individuals aged 45-74.

A mammogram is an X-ray of the breast. Screening mammograms are the best way to find breast cancer early, when treatment may work better. Getting screened for breast cancer saves lives.

More information about breast cancer screening and who is eligible can be found by visiting https://screeningforlife.ca/breast/get-screened/#who_should_get_screened.

A mobile mammography trailer will be at the St. Paul Community Health Services (5610 50 Avenue) on July 2-6 and July 8-11. Appointments are required. Call 1-800-667-0604 to book an appointment or learn more about the program.

Visit <https://screeningforlife.ca/breast/screen-test-mobile-clinics/> for more information and a complete listing of communities that the Screen Test mobile visits.

Screen Test is improving access to cancer screening for thousands of individuals in Alberta communities where mammograms are not readily available.

Alberta Health Services is the provincial health authority responsible for planning and delivering health supports and services for more than four million adults and children living in Alberta. Our mission is to provide a patient-focused, quality health system that is accessible and sustainable for all Albertans. Our current focus is on reducing emergency department wait-times, improving EMS response times, increasing access to surgeries, and improving patient flow.
