Eligibility Criteria	Yes	No
1. Premature: less than or equal to 29 6/7 weeks gestational age and born after April 30, 2023 (less than 6 months of age as at November 01, 2023)		
2. Premature: 30 0/7 to 32 6/7 weeks gestational age and born after August 31, 2023		
3. Premature: 33 0/7 to 35 6/7 weeks gestational age and born after September 30, 2023 and answers yes to one of the following questions: Does the family live more than 2 hours from the nearest hospital that provides bronchiolitis treatment? Does the family live in a remote location with no permanent road access? (i.e. Fox Lake) <i>Point of emphasis: In some situations, there may be an increased risk of severe RSV infection. These risks include being male, SGA (< 10th percentile) part of a crowded household, exposure to smoking and siblings at daycare. In extreme situations, RSV prophylaxis may be warranted. For consideration of a patient with unusual combinations of the above issues, please submit a detailed request to the RSV Prevention Program. It is expected there will be very few approvals based on these grounds.</i>		
4. Premature: less than or equal to 35 6/7 weeks gestational age and less than 2 years of age as at November 01, 2023 with chronic lung disease as evidenced by: (Check all applicable factors) <input type="checkbox"/> home oxygen after April 30, 2023 <input type="checkbox"/> on long term prophylaxis or recent exacerbation needing systemic steroids <i>Requirement for oxygen due to central apnea or obstructive sleep apnea are not indications for use of RSV Immunoprophylaxis</i> Details: _____		
5. Severe hemodynamically significant congenital heart disease: age less than 1 years of age as at November 01, 2023		
Provide specific diagnosis and/or cardiac medications		
Approved by Cardiologist (Name)
