Women 75 and over	Screening mammogram every 2 years or as indicated.	NO – clients may self-refer

*(*TOP Breast Cancer Screening Summary - September 2013*)

Other important information:

- Patient is ineligible if pregnant, possibly pregnant or has breastfed in the past 3 months.
- Patient is ineligible if she has clinical symptom of breast cancer (*i.e. new lump, bloody nipple discharge*). Refer to a diagnostic facility as indicated.
- Patients with prior breast cancers require at least one diagnostic mammogram following cancer diagnosis. They are eligible for a screening mammogram one year following their normal diagnostic mammogram.
- Patients with breast implants can now be seen on the mobile unit (*some restrictions may apply*).

Screen Test operates the mobile mammography service of Alberta Health Services. Screen Test provides digital mammography services to over 100 communities to women in the convenience of their own community. For more information about Screen Test visit www.screeningforlife.ca/screentest.
